

ABOUT CSI

CSI Aviation Services, Inc. (CSI) established in 1979, has grown to our present position as a diversified and experienced worldwide aviation services company. We deliver value in terms of industry knowledge, quality of service and price.

Our experience also gives us a distinct advantage in complex requirements. We arrange air charter services, aircraft leasing and maintenance, to include wet or dry leases (AIM or ACMI) or aircraft purchase.

We serve multi-national corporations, athletic teams and government agencies with air charter and aircraft leasing. Additionally, corporations and government agencies rely on our resources as part of their emergency response programs to conduct personnel evacuations worldwide.

We arrange commercial aircraft, executive jets and turboprops, using a wide variety of certified air carriers, as agent for our customers or the air carrier. By virtue of our position as an aviation management company, versus being an operator of a specific aircraft type, we are *not* limited to just one class of aircraft and our flexibility is what guarantees aircraft availability. CSI has no geographic restrictions.

Since 1983, CSI's **Military Services** continues to provide airlines with experienced representation to the U.S. Department of Defense (DOD) to support the military airlift market. As the assigned agent for various U.S. airlines, we represent these air carriers to the DOD through the U.S. Transportation Command (USTC). This entails handling Civil Reserve Air Fleet (CRAF) issues and coordinating domestic and international military air charter requirements. Participation in the CRAF program is vital to our nation's wartime airlift capacity and ensures that the DOD has access to supplemental aircraft. As a participant in the CRAF program, air carriers operate military air charter requirements during peacetime, and our assistance enables them to generate supplemental revenue.

Since 1990, CSI has held several **Government Contracts** supporting the federal government air transportation system. Services include air charter flights, aircraft lease, aircraft purchase and aircraft support services such as maintenance, standby aircraft and aircraft management. We have various contracts in place with numerous agencies.

Since 2004, CSI has held a **GSA Schedule** for Air Charter and Aircraft Leasing. Our GSA Schedule offers the government the ability to use a convenient contracting tool for a full range of aircraft using certified air carriers.

Since 2007, CSI offers **Private Jet Membership** and hourly packages for jet membership. We use the finest and safest executive jets and can offer members guaranteed availability.

Since 2009, CSI offers **Fuel and Ground Services** with our knowledge and expertise in consolidating uplift and arranging ground support services to benefit our customers. Our assistance enables customers to increase profitability by reducing expenses.
